Rate Designation: (Purchase) Co-generation & Small Power Production Service

Class of Service: Any single-phase or three-phase member-consumer with electric generating design capacity of 100 kW of less.

Service Area: Entire System

Availability: This section shall apply to any member-consumer with qualifying co-generation or small power production facilities as defined by Section 250 Chapter 15, Iowa Administrative Code and 18 CFR Part 292, Subpart B. Service will be accepted by the Cooperative pursuant to the provisions above and to the Cooperative’s Electric Interconnection Requirements.

Rate: The member-consumer will remain on the rate previously designated by the Cooperative based upon the restrictions within each rate class until another rate classification is more appropriate.

Payment for Energy: Payment for energy shall be based on (1) 100 percent of the Cooperative's wholesale energy component charge, adjusted for seasonal variations in such charges, and (2) 100 percent of the Cooperative's wholesale energy component charge as differentiated by on-peak and off-peak periods. Designation of on-peak and off-peak periods shall be made by the Cooperative and shall reflect time-differentiated wholesale energy component costs, if any.

Payment for Capacity: Payment for capacity shall be based on (1) 100 percent of the Cooperative's wholesale capacity component charge, adjusted for seasonal variations in such charges where such charges can be shown by the qualifying facility to be capacity costs avoided by the Cooperative, and (2) 100 percent of the Cooperative's wholesale capacity charge as differentiated by on-peak and off-peak periods where such charges can be shown by the qualifying facility to be capacity costs avoided by the Cooperative. Designation of on-peak and off-peak periods shall be made by the Cooperative and shall reflect time-differentiated wholesale capacity component costs, if any. In the absence of a specific showing by the qualifying facility as set out above, an allowance of 10% of the design capacity of the generating facility may be allowed by the Cooperative.

Specific wholesale energy and capacity (demand) charges are filed with and available from the Iowa Utilities Board.

Issued: 09/08/10
